

Human Defense for the Public Sector

Comprehensive detection, protection, and response for accounts and sensitive information

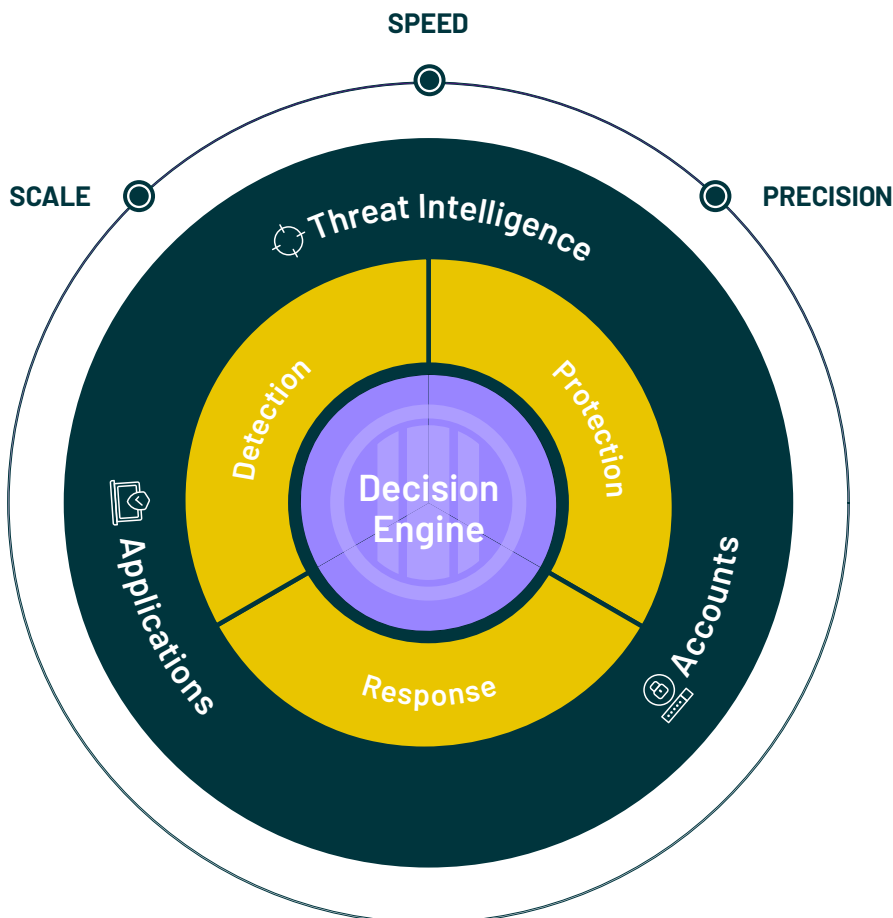

One modular platform offering unmatched visibility and control to safeguard against automated threats and fraud

HUMAN Security provides agencies and organizations with technologies to detect malicious bot activity and solutions to secure accounts and sensitive information.

With a modular suite of solutions, clients can fine-tune their security posture and data theft prevention with tailored controls to meet their policy and compliance requirements.

HUMAN helps agencies and organizations continue to provide mission-critical services at scale without hindering user experience or compromised data security. HUMAN enables organizations to maintain trust in their digital interactions and safeguard data.

HUMAN's unrivaled visibility generates unique telemetry data at every touchpoint along the digital journey to protect your critical surfaces against sophisticated bot attacks, account takeover and abuse, and client-side threats. Gain real-time visibility into the unique threats accounts and information with advanced analytics and drill-down paths to identify and counter-emerging threats in real time. Using adaptive machine learning, HUMAN generates preventative controls offering unparalleled scale, speed, and decision precision to combat threats targeting your most critical surfaces.

Threat Intelligence

- Bot Threat Feed
- Bot Threat Assessment

Application Protection

- Scraping
- Client-side
- Transaction Abuse
- PCI DSS 4 Compliance
- Data Contamination
- Account Takeover

Account Protection

- Account Takeover
- Fake Accounts
- Compromised Accounts

Harness the Power of One Platform for Safer Interactions, and Transactions

THREAT INTELLIGENCE

Enhance understanding of threats with a net-new signal for optimizing monitoring capabilities, covering 3 billion devices and over 20 trillion interactions each week.

APPLICATION PROTECTION

Protect web and mobile applications from fraud and abuse, including web scraping, data contamination, transaction abuse, and malicious code injection by third-party apps.

ACCOUNT PROTECTION

Comprehensive security for online accounts, minimizing security breaches and incidents of fraud, combining pre-, at, and post-login defenses.

Key Capabilities

Comprehensive Protection: Robust threat protection across multiple attack surfaces, including applications and accounts, to protect accounts and sensitive information.

Modularity: Choose the combination of Human Defense Platform solutions that meet your policy and compliance requirements.

Decision Engine: Unparalleled accuracy based on 2,500 signals parsed through 400+ algorithms and adaptive machine learning models for high-fidelity decisioning.

CDN Agnostic: Accommodate your unique infrastructure needs with a versatile approach to tailor defenses.

Satori Threat Intelligence: Uncovers, reverse-engineers, and takes down bot-driven threats.

Integrations: Remove deployment complexity by leveraging our robust ecosystem of application and architecture partners.

The Human Advantage

Scale

We verify more than 20 trillion digital interactions weekly across 3 billion unique devices providing unrivaled threat telemetry.

Speed

Our Decision Engine examines 2,500+ signals per interaction, connecting disparate data to detect anomalies in mere milliseconds.

Decision Precision

Signals from across the customer journey are analyzed by 400+ algorithms and adaptive machine-learning models to enable high-fidelity decisioning.

HUMAN is a leading cybersecurity company committed to protecting the integrity of the digital world. We ensure that every digital interaction, transaction, and connection is authentic, secure, and human. HUMAN verifies 20 trillion digital interactions, providing unparalleled telemetry data to enable rapid, effective responses to the most sophisticated threats. Recognized by our customers as a G2 Leader, HUMAN continues to set the standard in cybersecurity. For more information, visit www.humansecurity.com
